

THE FOUR SUSPECTS

An attempted murder has been discovered. The cockroach victim is unable to tell you who attacked him. It's up to you to figure it out. Keep this case file close and eliminate the suspects as you uncover more information throughout the week.

SUSPECT #1 - ASSASSIN BUG

- Uses long proboscis to inject venom which liquifies prey
- Venom smells like almonds
- Often takes down prey much larger than themselves

SUSPECT #2 - CHILEAN ROSE TARANTULA

- Hunt at night
- Covered in irritating hairs to defend themselves
- Uses large fangs to inject venom which liquifies prey

SUSPECT #3 - JEWEL WASP

- Injects venom which turns prey into zombies
- Drags stupefied prey to an underground den
- Lays eggs on prey so that their young can feast on the zombified yet live prey

SUSPECT #4 - PRAYING MANTIS

- Takes down prey roughly the same size as themselves or slightly smaller
- Catches prey using incredibly strong claws
- Eats prey alive
