## Activity 4 – Butterfly Art

### **Butterfly Art**

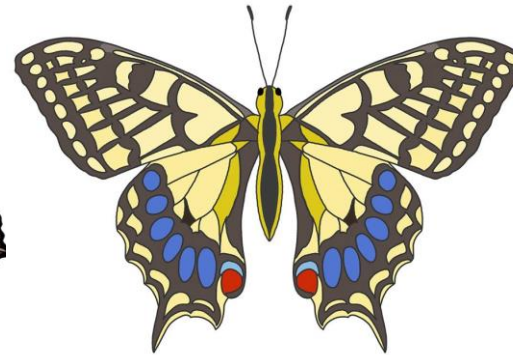

There are roughly 20,000 known butterfly species in the world! Here in the UK we are lucky enough to have 59 species – 57 of which live here all year round, and two migrant species who come and visit us every year (the Painted Lady and the Clouded Yellow). Butterflies come in all different colours. We want you to get creative and fill in a butterfly using your favourite colours on the next page – and don't forget to name your new butterfly too! Below are some examples of British butterflies to get you inspired!

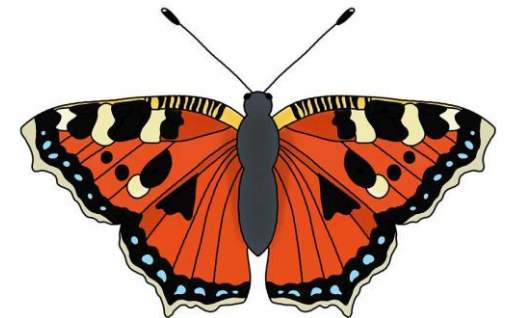

Red Admiral

Peacock

Swallowtail

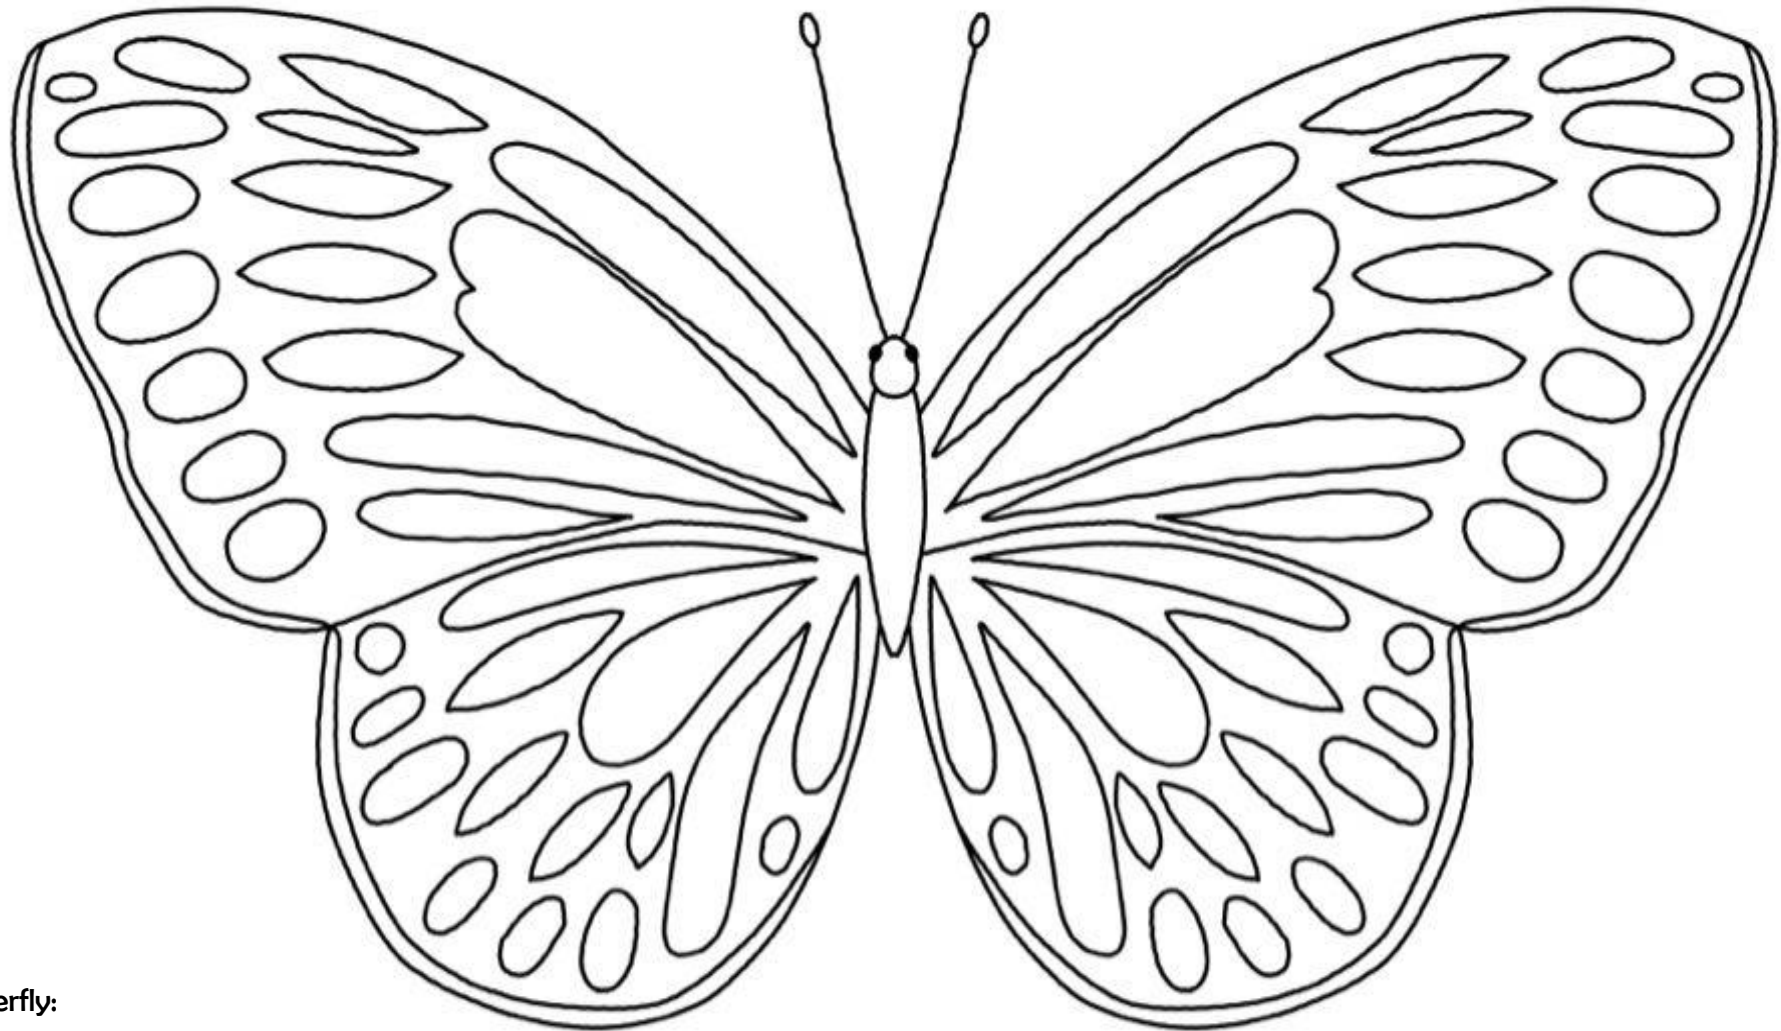

Tortoiseshell

All butterflies are beautiful, and it is down to personal taste which one you think is the prettiest! Why not go out butterfly spotting and see which one you like best? It might help you with the activity too!
