

# Can you see me?

Leaf insects are amazing at camouflage!

Their leaf-like bodies blend in to their environment! If you were a predator, could you spot them? Have a go: there are 9 in this picture!

How many can you spot?

# Can you see me?

Did you get them all?

They're so well camouflaged!

How many did you spot? Why not test your family?

# Can you see me?

Hiding in plain sight is a popular survival tactic for insects.  
Check out these other camouflaged insects!

These are VERY tricky!

# Can you see me?

The bottom left hand one is especially hard!

No predators are spotting these guys!

moth

leaf insect

stick insect

moth

Well done if you spotted them!
