Conservation – Disappearing Habitats

Habitat loss is one of the main threats to wildlife around the world. Two habitats that are quickly disappearing are rainforests and the polar ice caps. Why does it matter if they disappear? Choose one of these habitats and use books and the internet to find out more about them!

Chosen habitat:

Where is this habitat?
(colour it in on the map)

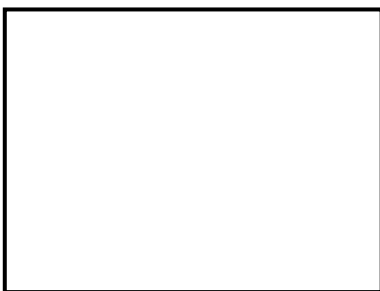

Where/what is the biggest
example of this habitat?

What is the climate like in this habitat? Is it hot or cold, wet or dry?

What are three examples of plants you can find in this habitat?
Draw them in the boxes.

1. _____ 2. _____ 3. _____

What are three examples of animals that live there?

1. _____ 2. _____ 3. _____

Name:

Date:

Do any humans live there? If so, what is the name of their people?
What do they eat? What do they use to make their houses?

Would you like to live there? Why?

How much of this habitat has been lost in the last ten years?

Why is this habitat disappearing?

Why should we save this habitat?

What can we do to help save this habitat?
