

Make a Nature Reserve!

Places set aside for animals are called 'nature reserves'. Can you make a model of a nature reserve? Find an old shoe box and turn it on its side. Then use paper, pens, tissue paper, leaves and all sorts of useful materials to make some model habitats for animals with trees, a pond, any features you like! You can choose one habitat or make several! You want your reserve to be a nice place for as many different animals as possible so remember to include lots of things they might need; sand, snow, sea, cliffs and so on! Don't forget to make some microhabitats too, with rocks and logs for animals to hide under! Then put some animals in your reserve!

Send us a photo of your reserve to be in with the chance to win a free family entry voucher!
