

Super Similar Snails!

Snails seem very different to us! They don't have arms, legs or faces and they're so slimy! But they actually aren't so different! Can you match the snail body parts to our own from the list at the bottom?

The shell is tough and supports the snail like our _____

The foot helps the snail move from place to place like our _____

The 'mantle cavity' is a space for breathing much like our _____

These round ends of the tentacles help snails to see just like our _____

The 'radula' grinds down food and takes it in, just like our _____

EYES

LUNGS

LEGS

SKELETON

TEETH AND TONGUE
