

# Seeing is Believing!

Animals that live in snowy places are often white to help them blend into their snowy background. This is called camouflage. It helps them hide from predators or sneak up on their prey unseen. Can you spot the camouflaged animals in the picture below?

1) How many Arctic wolves can you see in the right hand picture?

2) When the wolves have gone, the hares come out. How many Arctic hares can you see?

# Seeing is Believing Answers!

Check to see if you found them all!

1) There are 4 Arctic wolves in the right hand picture.

2) There are 5 Arctic hares in the left hand picture.

Something to think about: Reindeer have special vision (UV vision) that allows them to spot wolves more easily.

Why do you think they have this?
